

Nurdaulet Sadvakas

CURRICULUM VITAE

System Administrator · AI / Backend Developer

Open to work

LOC Astana, Kazakhstan

ROLE System Engineer / Backend

LANG EN B2 · RU · KZ

SUMMARY

I keep infrastructure running — and build the AI assistants that run on top of it.

System administrator with current, hands-on responsibility for Windows and Linux infrastructure, Active Directory and Group Policy, network equipment, and the Bitrix24 CRM / internal business systems a sales team runs on — backed by a formal foundation in cybersecurity and backend development.

In parallel I ship production AI assistants: Retrieval-Augmented Generation over PostgreSQL / pgvector, the Claude API, and Telegram bots on aiogram, packaged with Docker. Bachelor of Cybersecurity, Astana IT University.

Windows Server

Active Directory / GPO

Linux · TCP/IP

Python · FastAPI

RAG · pgvector

Claude API

Docker

WordPress

Bitrix24

FOCUS NOW

Two tracks, run together

The day job is infrastructure. The build habit is backend and applied AI. Both feed each other — automation, monitoring, and reliable deployment show up on both sides.

SYSTEMS & INFRASTRUCTURE

- Windows Server and Linux administration
- Active Directory, Group Policy (GPO)
- Network equipment, TCP/IP, monitoring
- Backup, recovery verification, documentation
- Bitrix24 CRM and internal business systems

APPLIED AI & BACKEND

- RAG pipelines: chunking, embeddings, pgvector
- Claude API answer synthesis and prompting
- Telegram bots on aiogram 3, FastAPI services
- PostgreSQL, Alembic, Docker Compose delivery

EXPERIENCE

Where I have worked

Jul 2026

present

Melody House LLP

System Administrator

Astana, Kazakhstan

- Run server infrastructure on Windows Server and Linux.
- Administer Active Directory and Group Policy Objects (GPO).
- Configure, monitor and maintain network equipment; work at the TCP/IP level.
- Own data backup and recovery verification.
- Support users and maintain the internal technical documentation.

2026

ongoing

Blart (BI Education)

Internal Systems & Automation

Astana, Kazakhstan

- Configure and support Bitrix24 CRM for the sales team: deal-card layouts, pipeline stages and the rules for how deals move through them.
- Support the internal sales-accounting system («Uchyotka») the sales staff work in daily — sales, class scheduling, student records, database.
- Maintain Blart's corporate website on WordPress: pages and content, theme CSS / JS, PHP templates and plugins.
- Built and run the Blart Support Bot — a Telegram assistant answering staff questions on Bitrix24 and «Uchyotka» from a knowledge base (RAG + Claude API).
- Documented the company's sales and operations processes end to end.

Mar – Aug 2026

BI Education

Full-stack Developer – Internship

Astana · AITANYM project team

- Built and maintained frontend and backend for the AITANYM platform — video lessons for school students across Kazakhstan.
- Wrote Python / Manim scripts that render professional-quality educational videos; designed shorter production workflows that measurably sped up the whole team.
- Acted as QA engineer for the platform website: tested, found issues, shipped fixes during development.
- Worked with databases and REST APIs on product tasks.
- Drove outreach: presented the project to partner-school administrations in person, prepared and negotiated cooperation agreements.
- Ran the project's official media account — content, client communication, technical support.

Feb – May 2025

Qazaq Cyber Sport Federation

Frontend Developer – Internship

Astana, Kazakhstan

- Maintained and developed the federation's official site on WordPress — theme templates, custom CSS / JS, and page building.
- Reworked the site structure and visual design; worked with PHP template files and plugins.

May – Jul 2024

Qazaq Cyber Sport Federation

Frontend Developer – Internship

Astana, Kazakhstan

- Fixed UI bugs and interface issues on the official WordPress site.
- Improved cross-device responsiveness; updated pages and content to new requirements.

PROJECTS

Project card

Selected work, real and side — kept to the ones that stand on their own technically.

Blart Support Bot

SOLE DEV · 2026

Internal employee-support assistant on Telegram

Answers staff questions about Bitrix24 and the internal accounting system from a knowledge base, and hands off to a live operator when it cannot — relaying messages both ways.

- RAG over a Markdown knowledge base: chunking, embeddings, pgvector similarity search.
- Answer synthesis with the Claude API, with graded modes: relay-only → quote mode → full AI answers.
- Role model (employee / operator / admin), open self-registration, operator case workflow, admin statistics.
- Menu built automatically from knowledge-base front-matter; Alembic migrations; Docker Compose deployment with restart policy.

Python

aiogram 3

PostgreSQL / pgvector

Claude API

Alembic

Docker

pytest

AITANYM — video pipeline

DEV & QA · 2026

Production system for educational lesson videos

Tooling behind BI Education's AITANYM project, producing lesson videos for Kazakhstani schools.

- Python + Manim scripts that render animated educational videos.
- A streamlined multi-step production workflow adopted across the team.
- QA of the delivery website: test, report, fix.

Python

Manim

REST APIs

SQL

Softly — finance tracker

SOLE DEV · 2026 · PERSONAL

Go service + PostgreSQL + installable PWA

Turns bank notifications and statements (Kaspi, Freedom, Halyk and others) into categorized analytics. Included as a technical showcase.

- Free-text notification parser: amount, currency, merchant, card, balance — handles RU / KZ / translit / EN, filters out one-time codes.
- Statement import (CSV / XLSX / PDF) with header and heuristic column detection; deduplication across push and statement rows.
- Rules engine, 20+ categories tuned for Kazakhstani merchants; analytics: category trend vs last month, yearly dynamics, month-end forecast, budgets.
- Offline-capable PWA, IMAP poller, single self-hosted binary with the web UI embedded.

Go

PostgreSQL

PWA

Docker

IMAP

Blart — corporate website

WORDPRESS · 2026

Company website on WordPress

Ongoing work on Blart's main corporate website, built on WordPress.

- Build and update pages and content — layout, menus, media.
- Theme-level work: custom CSS / JS, responsive adjustments, template tweaks.
- PHP template edits and plugin setup / maintenance.

WordPress PHP CSS JavaScript

QCSF — official website

FRONTEND INTERN · 2024-2025

WordPress site for the Qazaq Cyber Sport Federation

Two internships maintaining and modernizing the federation's public site — built on WordPress rather than static HTML.

- Worked inside the WordPress theme: template files, custom CSS / JS, responsive fixes.
- Page building and content — menus, media, block layout.
- Restructured the information architecture and refreshed the visual design.
- Edited PHP template code and configured plugins.

WordPress PHP HTML CSS JavaScript

SKILLS

Capabilities

SYSTEM ADMINISTRATION

EDUCATION

Education

Sep 2022 – Jun 2025

Astana IT University

B.Sc. – Cybersecurity

Astana, Kazakhstan

Core coursework: network security, operating systems (Linux), databases, computer networks, secure programming, malware analysis, web technologies.

REFERENCE

From the BI Education letter

“By the end of his internship, Nurdaulet had become an essential and, in many respects, irreplaceable member of the team.”

The letter also notes he was “one of the most consistent sources of new ideas within the team,” that he adapted quickly to new tools and responsibilities, and that his contribution ran across development, QA, marketing and media.

Gulnara Tanbayeva – Mentor, AITANYM project – BI Education

Ilyas Sartayev – CTO, BI Education

Full recommendation letter (BI Education, August 2026) available on request.

WORKING STYLE

Strengths

- ✦ Highly proactive — repeatedly the initiator of new ideas (noted in the BI Education reference).
- ✦ Fast learner; adapts quickly to new tools and responsibilities.
- ✦ Strong analytical and problem-solving thinking.
- ✦ Effective both solo and as part of a team.
- ✦ Responsible and disciplined, with a consistently high standard of delivery.
